Continuation of 11. does NOT place the application in condition for allowance because the applicant's arguments are not persuasive. The applicant argued that the examiner's interpretation of Walak's anchors 50, 52 as a cutting member is improper. This is not persuasive because the anchors 50,52 are fully capable of providing a cut, which is defined as "to penetrate with or as if with an edged instrument". Furthermore, as stated in the last paragraph in page 5 of the applicant's remarks, the applicant concurs that anchors 50,52 are used to "penetrate" the walls of a blood vessel. Thus, anchors 50, 52 satisify the definition of a cutting member, which is to penetrate with said member.
